

ECO- FRIENDLY FACE MASK MAKING VIDEO -EARTH DAY SPECIAL

Disposing of face masks used by people during the Covid pandemic poses a huge challenge to our planet. Every minute of the day we throw away 3 million face masks. Made of Nano plastics, even if decomposed, they have a significant impact on the environment. NSS volunteers thought that the only solution to this problem was an eco-friendly- degradable cotton mask, which could be washed and re-used. The NSS units of Panampilly Memorial Government College produced a video to train the public on how to make an eco- friendly - degradable mask with seeds sewn in it and shared it on social media. NSS volunteer Geethu Gopi was the leader in this making of eco-friendly mask.
